*What's a
UNeMed?*

tech transfer &
commercialization

University
for the of
Nebraska

serving UNMC, UNO & all collaborations in between

bright ideas
amazing discoveries
new inventions
all those better ways

*don't often get
far without help*

those things cost \$\$\$

to

Make...Market...Develop

so, to get that

bright idea
amazing discovery
new invention
better way

into the hands of the people...

**...UNeMed makes all the difference
& gives a technology its best chance.**

What's a UNeMed?

Originally created in 1991, UNeMed was established as the commercialization entity for the University of Nebraska Medical Center. The mission of advancing academic medical research "from bench to bedside" has expanded to include UNO innovations. But, we intend to keep the "Med" in our name. It's on all our stationery, and we've built a lot of good industry relationships on that name.

Great, so how does it work?

FIRST

disclose your

- ✓ discovery
- ✓ concept
- ✓ design
- ✓ device
- ✓ composition
- ✓ system
- ✓ software program

to UNeMed

Our "New Invention Notifications" are held in strict confidence

SECOND

One of UNeMed's licensing professionals will evaluate the invention for its patentability and commercial potential.

Our team of technology transfer experts have more than 106 years of combined experience and hold 13 advanced degrees, eight at the doctorate level

THIRD

The invention is presented to UNeMed's Science and Technology Advisory Committee, which then recommends how to best proceed.

We might:

- ✓ suggest a new direction for future study
- ✓ pursue immediate patent protection
- ✓ reach out to potential partners
- ✓ recommend additional research

FOURTH

No matter what, our ultimate goal is always the same:

Do what best serves the technology, the university and its inventors.
